

Skin MD Natural

is a safe and effective breakthrough in natural skin-care technology.

The shielding lotion transforms the outer layer of skin into a hydrating, invisible shield by bonding with it to form a protective layer.

This layer not only locks in the skin's natural moisture but also prevents it from absorbing drying chemicals and pollutants.

The formula has a moisturising factor at least six times greater than glycerin, known for the record amount of moisture it draws into dry skin. Rsp
