SHIELDING LOTIONS

Skin MD Natural is a shielding lotion for hands that keeps moisture-robbing irritants at bay throughout the day. According to Skin MD Natural, the product is more effective for dry skin than traditional moisturising lotions or protective creams, as it seals natural moisture in while blocking out moisture-robbing elements and irritants. The humectant in Skin MD Natural has a moisturising factor of at least six times greater than glycerin, which until now has been the humectant against which all others are measured. Rsp £14.99, call 01277 354 374 for more details.

Gloves in a Bottle is a non-greasy, non-sticky, hypoallergenic and safe shielding lotion that protects the skin on the hands. By bonding with the outer layers of the skin to form a natural shield, Gloves in a Bottle locks in the skin's own moisture and oils, while giving complete protection against harsh weather conditions and moisture-robbing irritants to keep hands looking and feeling soft and smooth. Gloves in a Bottle cannot be washed away, coming off naturally after four to five hours with naturally exfoliated skin cells. It is available in a 240ml economical bottle or handy 60ml handbag size, rsp from £4.99. For more information see www.gjab.co.uk or call 0800 389 4710.

Briefly for men...

★ **MEN** looking for a hard-working moisturiser should check out Skin MD Natural, £14.99. This new lotion claims to bond the layers of the skin together keeping free radicals and irritants at bay. Once applied, the moisturiser is quickly absorbed.

Skin MD Natural Shielding Lotion, 120 ml, £8.99

Say goodbye to dry skin! Irritants are kept out while moisture is locked in with Skin MD Natural Shielding Lotion. This formula enhances the skin's own natural protective abilities by turning the outer layer of skin into a "hydrating invisible shield" - proven to be six times more effective than glycerin. Ideal for travel to dryer climates, we say!

HANDS

Hands are constantly exposed to the elements and cold weather, hot temperatures and regular hand washing all compromise the skin's condition. Using a hand shielding lotion such as Gloves in a Bottle or Skin Natural MD, to protect the skin can help prevent damage as they form a protective barrier on the skin and keeps out irritants and chemicals. They also allow the natural oils and moisture to remain in the skin, which prevents dryness and allows skin to heal more easily.
