

Shielding lotion

SKIN MD NATURAL

• Shielding lotion is far more effective for dry skin than moisturising lotions or protective creams, says its makers. Skin MD Natural is quickly absorbed without residue, transforming the skin's outer layer into an invisible hydrating shield.

• Glycerin is the industry standard humectant. Until now, no other humectant drew in as much moisture from the air, but Skin MD Natural's formulation has a moisturising factor six times greater.

• It combines the finest natural ingredients with latest advances in skincare technology to hydrate and protect skin, keeping moisture-robbing irritants out.
